*James V. Irving (“Jim”) and Phil W. Jaeger of Bean, Kinney & Korman, P.C. Represent Base Technologies, Inc. in its Sale to CA Technologies*

Dear Friends and Clients,

Jim Irving and Phil W. Jaeger of the law firm of Bean, Kinney & Korman, P.C. are pleased to announce the successful representation of Base Technologies, Inc. (“Base”) in its sale to CA Technologies (NASDAQ: CA). The transaction was announced by CA Technologies in the attached press release on April 6, 2011. Terms of the transaction were not disclosed.

Base Technologies, based in McLean, Virginia, focuses on the management of IT assets, with leading practices in virtualization management, mainframe technology, security and managed infrastructure.

“The acquisition of Base Technologies further expands our role as a strategic partner and advisor to U.S. public sector customers on computing environments and platforms,” said Adam Alster, general manager, CA Services, CA Technologies, in the press release from the company. “CA Technologies and Base Technologies will provide customers with both deep industry and technical expertise as well as leading management and security products and services for the cloud and virtualization.”

Also in CA Technologies’ press release, “The requirements of our U.S. Public Sector customers and system integrator partners are increasingly complex across all IT environments,” said Rob Davies, Base Technologies CEO. “We are thrilled to join forces with CA Technologies to help government customers gain more value from their IT investment as they work to achieve the business agility, cost savings and risk reduction of a cloud-connected enterprise.”

CA Technologies Acquires Leading IT Consulting Firm, Base Technologies

*Acquisition to Further Accelerate CA Technologies Growing U.S. Public Sector Business*

ISLANDIA, N.Y. April 6, 2011 - CA Technologies (NASDAQ: CA) today announced the acquisition of Base Technologies, a privately-held consulting firm focused on the management of IT assets, with leading practices in virtualization management, mainframe technology, security and managed IT infrastructure. Terms of the transaction were not disclosed.

“The acquisition of Base Technologies further expands our role as a strategic partner and advisor to U.S. Public Sector customers on all computing environments and platforms,” said Adam Elster, general manager, CA Services, CA Technologies. “CA Technologies and Base Technologies will provide customers with both deep industry and technical expertise as well as leading management and security products and services for the cloud and virtualization. Together, we will help government customers identify the most efficient use of their investments, manage their large-scale programs more effectively, and determine the best use of virtualization and cloud computing.”

The Base Technologies acquisition increases the technical capabilities of CA Services and further strengthens CA Technologies and its alliance partners’ ability to execute on all stages of the Federal buying cycle. This allows CA Technologies to better take advantage of a growing \$86 billion market for software and IT services (Source: INPUT’s Federal IT Services Industry Outlook, 2010-2015, January 2011.)

“The requirements of our U.S. Public Sector customers and system integrator partners are increasingly complex across all IT environments,” said Rob Davies, Base Technologies CEO. “We are thrilled to join forces with CA Technologies to help government customers gain more value from their IT investment as they work to achieve the business agility, cost savings and risk reduction of a cloud-connected enterprise.”

Base Technologies brings to CA Technologies 23 years of experience in the U.S. Public Sector, along with a track record of success with customers such as the Department of Defense, Department of Homeland Security, National Institute of Health, Federal Aviation Administration, and Commuter Connections, among others.
